2

Brainstorm

- Research
- Ideas
- Features & Aesthetics

4

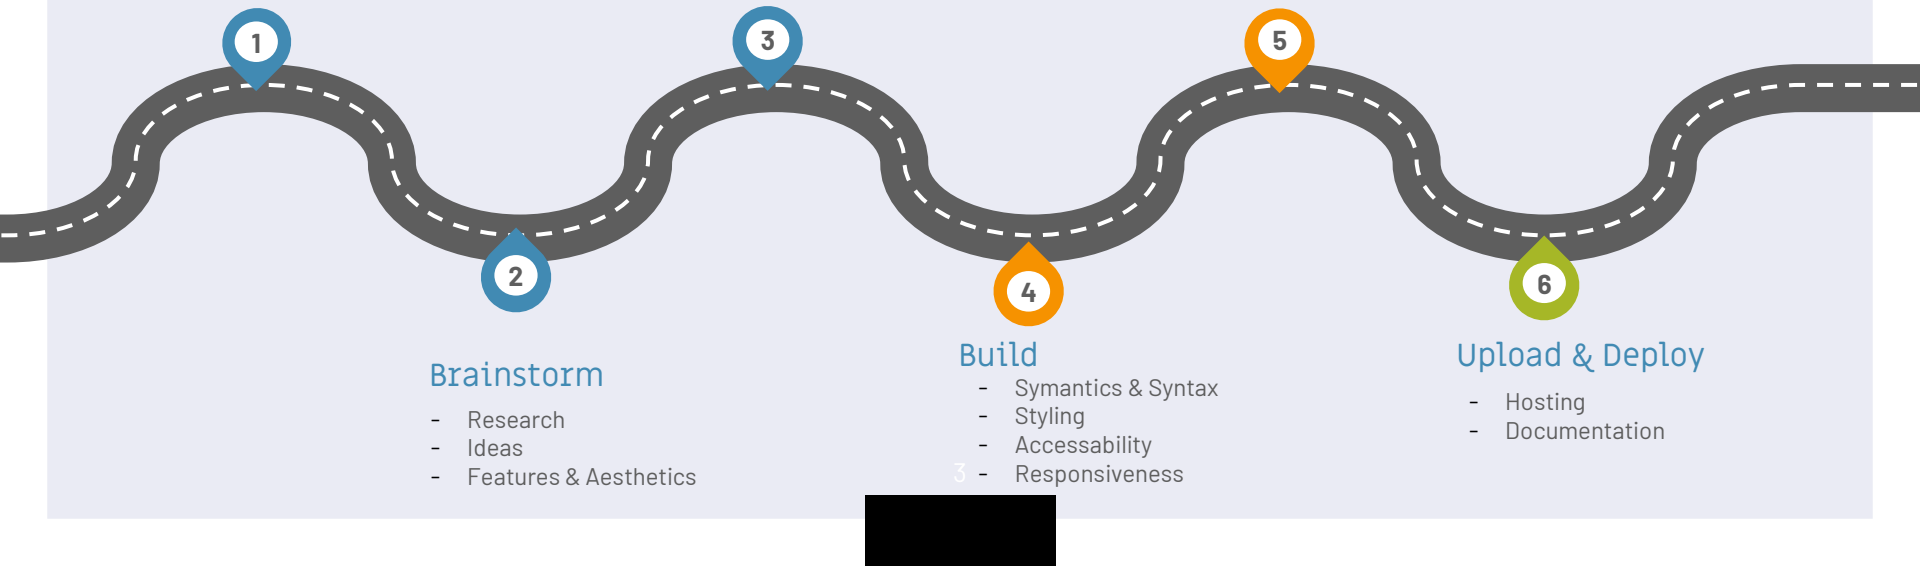

Build

- Symantics & Syntax
- Styling
- Accessibility
- 3 - Responsiveness

6

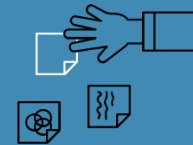

Upload & Deploy

- Hosting
- Documentation

1. Assess Criteria

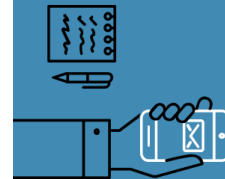

Purpose

The purpose of this website is to showcase myself as a software developer to employers and prospective clients. The website provides information about my professional background, skills, interests and coding abilities.

Target Audience

The target audiences are prospective clients and employers. I have made the assumption that viewers have a basic understanding of programming languages and development stacks.

2. Brain storming results

Easy to
navigate

SITE

Walk through

Features

Navigation Header

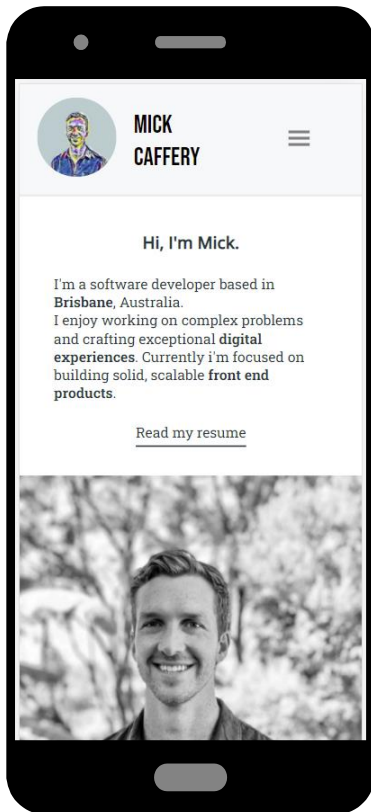

Simple navigational header which is used across all pages.

- ▶ Shows name and avatar
- ▶ Easily navigate to each page
- ▶ Underline shows current page
- ▶ Hover effect changes font to black
- ▶ Responsive

Features

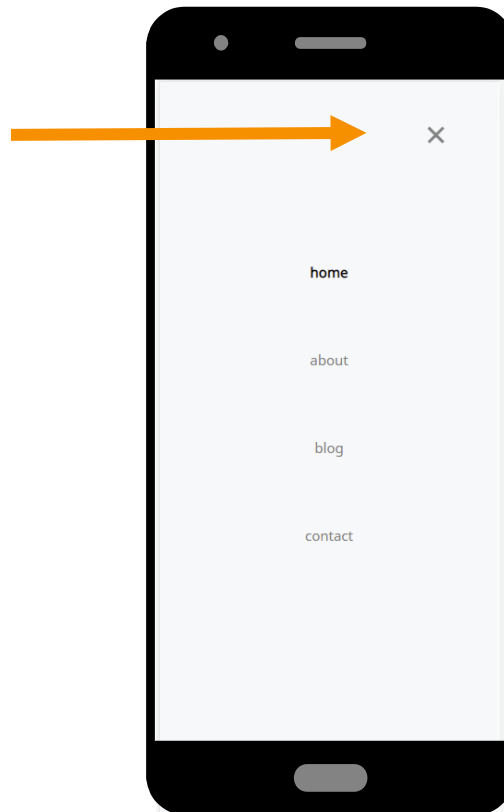

Navigation Header - Mobile

← Switches to hamburger menu on narrow screen sizes

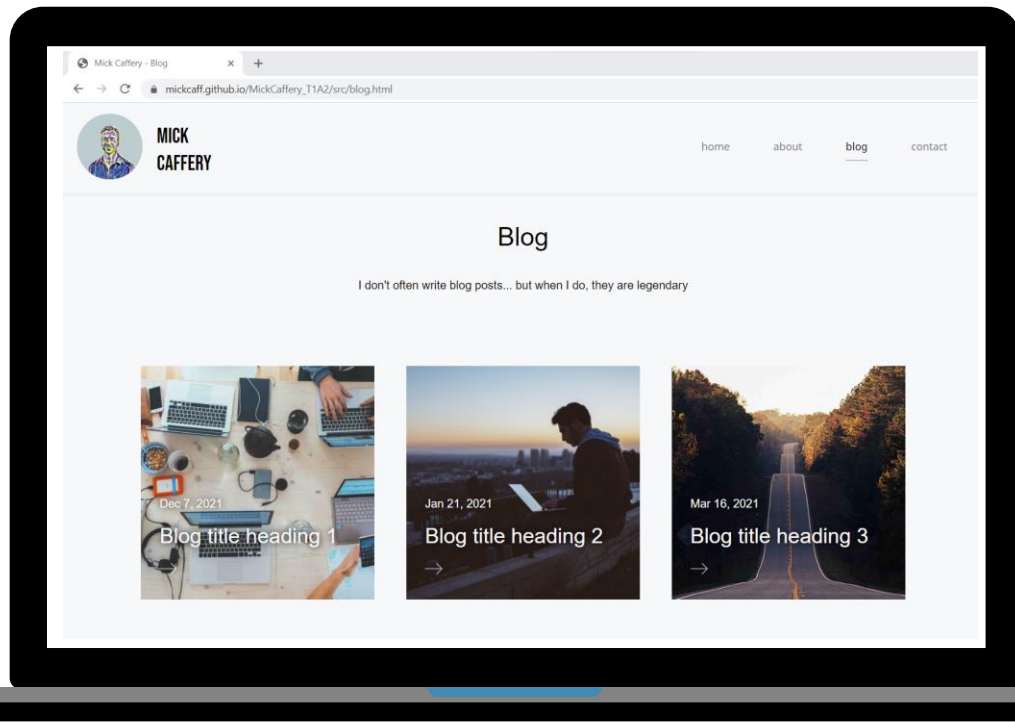

- ▶ 3 lines changed to an X to close
- ▶ Use of transition 0.5sec – opens smoothly
- ▶ Not fixed to top to allow for maximum screen size for reading content
- ▶ Black text and shadow shows current page

Features

Blog tiles

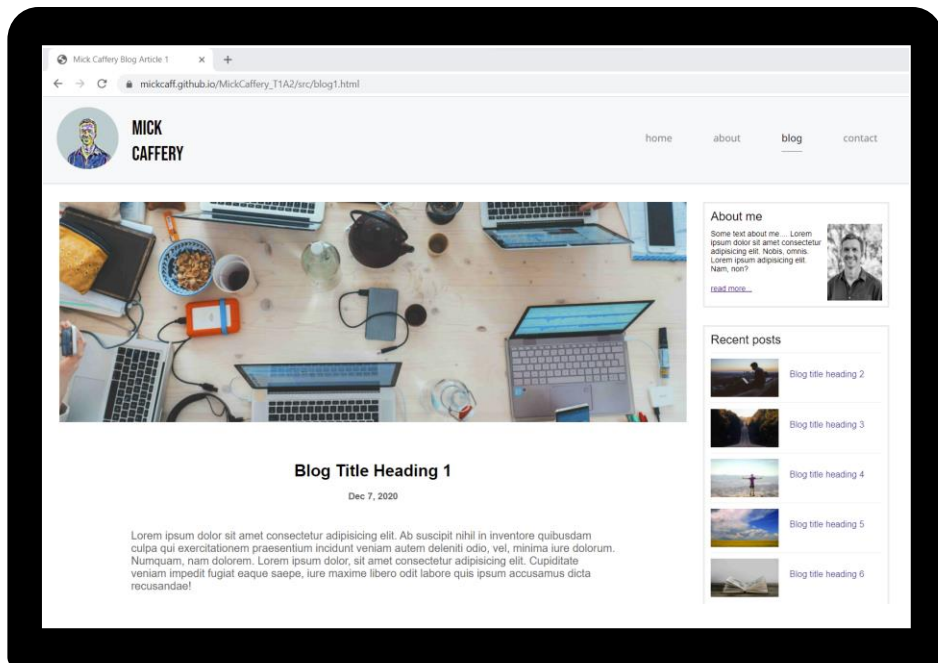

Blog tiles

- ▶ Use flexbox to display in grid pattern
- ▶ Responsive to screen width
- ▶ The use of text shadow black to help blog titles show clearly
- ▶ Professional eye-catching hero photos

Features

Blog article layout

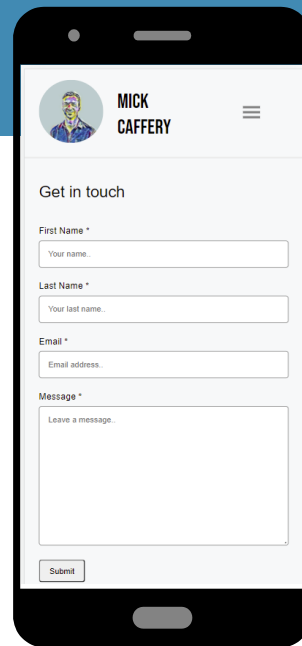

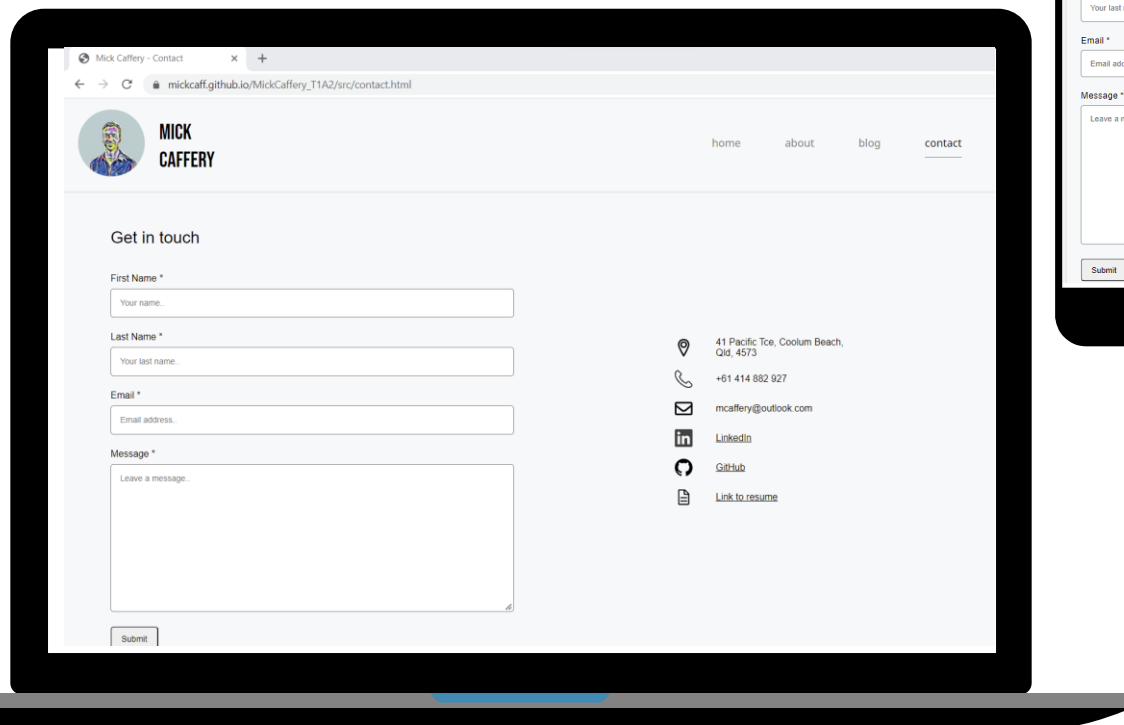

Blog article pages

- ▶ Use flexbox to display in grid pattern – left column wider
- ▶ Responsive to screen width
- ▶ Recent posts are sticky to the top – so as you scroll down you can still see other blog posts to read

Features

Contact form

Contact form

- ▶ Responsive to screen width
- ▶ The use of icons to convey meaning
- ▶ Links open in new tabs. So the user is not taken away from the site.

Review

Challenges

- ▶ Rabbit holes
- ▶ Spending too long on styling
- ▶ Knowing when it's finished
- ▶ Learning CSS layout and flexbox

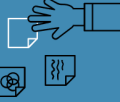

Favourite Parts

- ▶ First website!!!
- ▶ Sense of accomplishment
- ▶ The whole project
- ▶ Responsiveness

Ethical Issues

- ▶ Image copyright -> Open source images
- ▶ Making sure it is accessible

THANKS!

Any questions?
